Project Executable Files

Date	15 March 2024
Team ID	UNM-293
Project Name	AI Comic Story Creator using Gemini Models
Maximum Marks	3 Marks
Submitted By	Dharshini.G

Project Executable Files
This section requires submission of all executable and deployable files for your project.
Ensure all files are properly organized, named, and uploaded to submission platform.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA - No DB, uses session
5	Environment config file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if mobile/desktop)	NA - Web App
8	Dockerfile / Containerization config	NA
9	Test files and test results	Yes
10	Demo video or walkthrough	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
/project-root - AI-Comic-Story-Creator-Gemini
-- app.py - Main Streamlit application entry
-- gemini_service.py - Gemini API story & image generation logic
-- prompt_builder.py - Converts story scenes to image prompts
-- comic_renderer.py - Renders comic layout with images + dialogues
-- requirements.txt - Python dependencies (streamlit, google-generativeai, Pillow)
-- .env.example - Contains GOOGLE_API_KEY placeholder
-- README.md - Setup and run instructions, features, screenshots
-- /assets - Sample comics, logos, UI images
-- /docs - Performance testing reports, test results, docs
-- /tests - test_gemini_api.py, test_prompt_builder.py
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://ai-comic-creator-gemini-unm293.streamlit.app
Login Credentials (Demo)	No login required - Open access. API key handled via secrets
Platform / Hosting Provider	Streamlit Cloud, GitHub
Repository Link	https://github.com/Dharshini-G/AI-Comic-Story-Creator-Gemini
Demo Video Link	https://drive.google.com/file/d/UNM293_Dharshini_Demo/view

Step 4: Run Instructions

Provide clear, step-by-step instructions for evaluator to run project locally:

Pre-requisites: Python 3.9+, pip, Git, Google Gemini API Key
System: Windows/Mac/Linux, 4GB RAM, Internet for API calls
Step 1: Clone repository: git clone https://github.com/Dharshini-G/AI-Comic-Story-Creator-Gemini
Step 2: cd AI-Comic-Story-Creator-Gemini
Step 3: Install dependencies: pip install -r requirements.txt
Step 4: Configure environment: copy .env.example to .env, add GOOGLE_API_KEY
Step 5: Run database migrations (if any): Not applicable - no DB
Step 6: Start application: streamlit run app.py
Step 7: Open browser at http://localhost:8501
Step 8: Enter theme, characters, genre -> Generate Story -> Generate Images -> Download PDF

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Gemini Imagen API latency 3-5 sec	Loading spinner & async
2	API quota 60 req/min free tier	Retry logic + caching
3	Image style variation	Fixed style prompt engineering
4	Large comics slow render	Limit 6 panels + pagination
